

Full-Service Drilling Fluids and Solids Control Company

LOCAL SOLUTIONS FOR LOCAL DRILLING NEEDS

DELIVERING VALUE

IDEC partners with its customers across the entire fluids cycle to ensure that they achieve maximum value.

We provide innovative products and exceptional service, enabling our customers to optimize drilling efficiencies and performance.

Whether it is a fit-for-purpose fluid formulation for drilling, removing 99% of drill cuttings, drilling horizontally, or critical service work on the most challenging wells, IDEC delivers.

With a multinational team with laboratories support, we deliver effortless solutions that enable customers to maximize the value of their assets.

Drilling Fluid Solutions

Innovative Products and Exceptional Service

We have a complete line of water-based and non-aqueous drilling fluid systems for land, offshore, HTHP, high angle, SAGD, and critical service applications.

- **ID- EASYDRILL** is our high-performance, water-based drilling fluid system that can be used in the most challenging and environmentally sensitive drilling applications.
- **ID-ADVERT** are our non-aqueous drilling fluids that offer diesel and synthetic based solutions.
- **TriMax** is our next generation deepwater drilling fluid that provides an engineered synthetic based system for challenging deepwater wells with narrow pressure windows.

IDEC provides the right Drilling Fluid Solutions and Services for the most challenging drilling projects.

Solids Control and Drilling Waste Management

High Performance, Reliable Equipment and Service

IDEC provides a full range of equipment that is designed for high performance and reliability. Optimization of Solids Control and Waste Management systems with drilling fluids on a project provides our customers with economic and effective solutions to the most challenging drilling environments.

Products and Solutions

- Shale Shakers & Mud Cleaners
- Replacement Shaker Screens
- Centrifuge Systems
- MUDSTRIPPER
- De-watering units
- Drill Cuttings Dryers (WBM & NAF)
- Mobile & Fixed Liquid Mud Plants
- High Efficiency Mud Mixing systems
- Mud Vacuum systems- 30hp to 150hp
- Brine & Waste Water
- Filtration Systems
- Mud Cooling Systems
- Waste Pit Remediation
- Waste Water Treatment & Recycling
- Evaporation Units
- Non-Toxic Geotextile Pit Liners
- Brine Reclamation
- Drill Cuttings Drying & Fluids Recovery
- Rig Tank Cleaning & Heavy Duty House Keeping
- Spill Containment & Clean Up

Technical Testing and Analysis

Comprehensive Labs

IDEC has developed a regional network of laboratories that support our commitment to provide "local solutions for local drilling needs", that provide local support to the field operations. Our services include:

- Research Support and Development
- Operations and Customer Support
- QA/QC
- Technical Training

WE DELIVER, NO EXCUSES
