

Mud Engineering Services

MUD SCHOOL CURRICULUM

- Advanced Fluids
- Basic Mud and Field Training
- Polymer Fluids
- Diesel Oil Muds
- Mineral Oil Muds
- Synthetic Muds
- Corrosion
- H2S
- Well Control
- Computer Technology
- Solids Control
- Pore Pressure Plotting
- Wellbore Stresses
- Hydraulics
- Horizontal Drilling Fluids
- Specialized Testing Procedures
- Completion Fluids
- Stuck Pipe
- Waste Management

Fully-Equipped Team of Mud Engineering Personnel

At IDEC, we make sure that our people receive leading-edge technical training, as well as skill-building programs and experiences. This kind of investment is not only good for our people, but also essential for our business. As our capabilities grow, so does our overall service to customers. Hence, we ensure that all of our field engineers and operators will exceed our customer's requirements. IDEC personnel surpass minimum qualifications, experience, and skills to perform assigned job responsibilities. We confirm that all personnel successfully complete safety and technical training courses recommended to perform job responsibilities.

Personnel for Engineering Services

IDEC field engineers are highly experienced with different drilling fluids systems, solids control, drilling waste management, and their applications. Lead engineers have more than 10 years' experience and are trained in the recommended drilling systems.

Extensive personnel training in specialized testing procedures

Solutions for a better return
